EDUCATION

Pace University, Seidenberg School of Computer Science & Information Systems

New York, United States

Master of Science in Computer Science. GPA: 3.97/4

December 2024

Rajeev Gandhi Memorial College of Engineering & Technology

Andhra Pradesh, India

Bachelor's Degree in Electronics & Communication. GPA: 8.25/10

August 2019

EXPERIENCE

TATA Consultancy and Services | Hyderabad, India | Software Engineer

August 2019 - December 2022

Genworth

- **Improved services by 2%** for one of the largest annuities providers in the US to optimize and enhance the offerings.
- **Engineered scalable backend services** using Spring Boot for transaction-heavy financial applications, ensuring data integrity and high performance.
- **Developed intuitive and responsive frontends** with React.js, creating reusable components, integrating Redux for state management, and ensuring cross-browser compatibility.
- Designed and implemented **RESTful APIs**, enabling secure third-party integrations and internal service communication.
- Conducted **unit and integration testing** with JUnit and Postman to validate backend logic and API endpoints.
- Collaborated with UI/UX designers and product managers to translate wireframes into clean, functional UIs.
- Leveraged **Git for version control**, managed code reviews, and integrated builds into **CI/CD pipelines** using Jenkins.

Apple

- Enhanced inclusivity within Apple's developer ecosystem by **85%**, successfully updating non-inclusive language across various platforms.
- Led the integration and management of GitHub processes, focusing on updating code and building services to ensure seamless updates across systems.
- Proactively debugged builds that were not functioning correctly, identifying root causes and escalating issues via the Radar system to the relevant team for resolution.
- Collaborated with team members to address coding challenges and enhance project outcomes, promoting effective problem-solving and system optimization.

TCS POC: CAB Web Application

- Developed a Cab Booking app with interfaces for users, drivers, routes, and admin using Java, Servlets, HTML, CSS, MySQL, Tomcat, and Jaspersoft Studio and server.
- Extract data from Users, Drivers, and Routes. Generated visual charts and dashboards with BI tools for client business analysis.

ACADEMIC PROJECTS

MediLink Health Management System

- Spearheaded the design and development of MediLink, utilizing HTML, CSS, and JavaScript to enhance front-end functionality, achieving a **30% increase in user engagement**.
- Developed robust backend functionality with Java, SQL and Spring Boot, implementing RESTful APIs to ensure efficient data handling and system integration.
- Leveraged Agile methodologies and tools like Jira, Jenkins, and Docker to streamline project delivery and improve deployment **efficiency by 25%**.

Path Traking Mobile Application (Visit: <https://path-in-nj.web.app/>)

- Designed and developed a mobile application for real-time train schedule updates in New Jersey PATH, **improving polling efficiency by 80%** and adding significant value for commuters.
- Leveraged Ionic React, JavaScript, APIs, and Capacitor/Cordova plugins to implement local notifications and vibration alerts of upcoming train arrivals, **enhancing user experience by 20%** for a seamless travel experience.

KEY SKILLS

- **Programming languages:** C, Java, SQL, Python
- **Web Technologies:** JavaScript, HTML, CSS, Bootstrap, React.js, Node.js, Angular
- **Tools:** Jira, ServiceNow, Postman, Docker, Jenkins, Kubernetes, AWS EC2, Eclipse IDE, IntelliJ, Visual Studio, Xcode, Maven
- **Framework:** Spring Boot, REST API, React Native, Ionic
- **Methods:** Agile Development, Git Version Control, Linux, Power BI
